HVLP AIR CAP AND FLUID NOZZLE CHART

MODEL NO.	AIR CAPS	Press / Siphon	*MAX GUN INLET PRESS. FOR HVLP	FAN CONTROL	SCFM @ MAX GUN INLET	AIR CAP RING	AVAILABLE FLUID NOZZLES TIPS	NEEDLES / marking on needle
P200H	22-1028	pressure	29	60-1502 (#2)	18	22-1001	32-0611 1.1mm (.042")	40-1211 (211)
	22-1033	pressure	38	60-1502 (#2)	18.75		32-0614 1.4mm (.055")	40-1214 (214)
	22-1057	pressure	50	60-1502 (#2)	22		32-0618 1.8mm (.070")	40-1218 (218)
	22-1100	pressure	37	60-1501 (#1)	18		32-0622 2.2mm (.086")	40-1222 (222)
	22-1100 X 2.2S	siphon	37	60-1502 (#2)	18		32-0211 1.1mm (.042")	40-1211 (211)
	22-1046**	pressure	47	60-1502 (#2)	22.5		32-0214 1.4mm (.055")	40-1214 (214)
	22-1083**	pressure	55	60-1502 (#2)	26		32-0218 1.8mm (.070")	40-1218 (218)
						32-0222 2.2mm (.086")	40-1222 (222)	

*Note: Air cap test gages are available to confirm HVLP compliance.

**Must be used with 32-02XX fluid nozzle tips

Operation and Maintenance Instructions for *P200H* Spray Guns

Operation

1. Connect air supply hose at handle of gun.
2. Connect a pressurized fluid supply to the gun fluid inlet.
3. Fluid flow can be controlled using the fluid control knob, this restricts flow by limiting needle travel. It is best to control fluid flow by proper selection of fluid orifice size and use the fluid control knob to “fine tune flow rate”.
4. Fan width can be adjusted using the fan control knob. Turning the knob clockwise narrows the fan.

Maintenance

IMPORTANT! Routine cleaning and maintenance is essential to insure proper gun operation.

Several states prohibit spraying solvent into the atmosphere and require the use of covered gun cleaner.

1. If a gun cleaner is being used, connect and clean the gun in the gun cleaner according to the manufactures instructions.
2. If a gun cleaner is not being used:
Remove air cap and clean separately using clean solvent.
For pressure setups, connect a pressurized solvent supply to the fluid inlet, trigger the gun allowing solvent to flow thru the gun until clean.

NOTE: Gun head disassembly is not recommended for normal cleaning and maintenance.

Gun head disassembly and reassembly instructions:

Have repair kit # 10-110 available before gun disassembly.

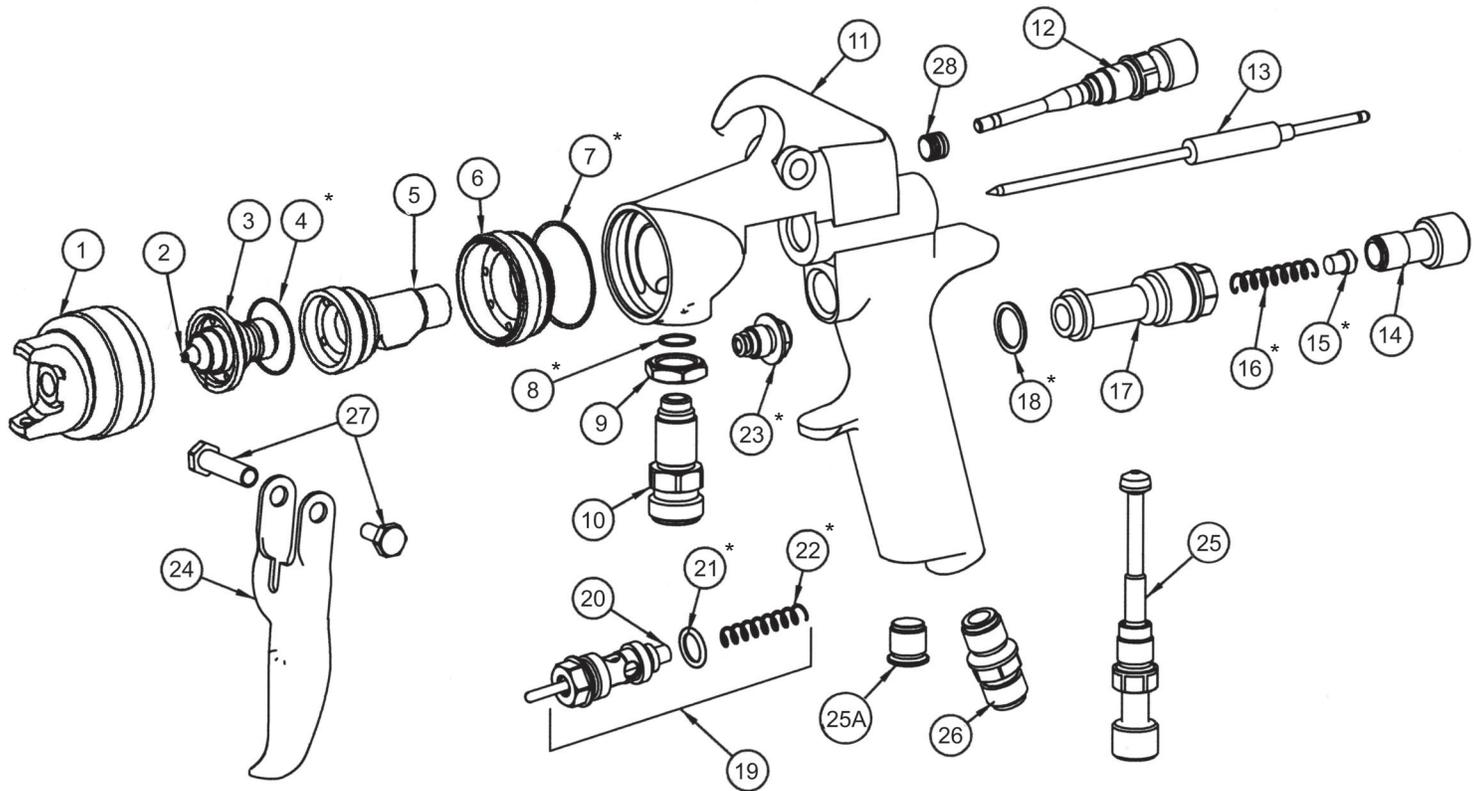

Gun head disassembly

To remove the nozzle carrier (5) and air cap adapter (6):

1. Remove the air cap (1), fluid nozzle tip (2), fluid nozzle body (3), and needle (13).
2. Remove the needle seal cartridge (23).
3. Loosen the locknut (9) and remove fluid inlet (10) using a 5/8” open-end wrench.
4. The nozzle carrier (5) and air cap adapter (6) will now slide forward from the gun body (11).

Gun head reassembly

1. Install a new o-ring (7) on the air cap adapter (6).
2. Install o-ring (4) between fluid nozzle body (3) and fluid nozzle carrier (5).
3. Install the thread locknut (9) onto the fluid inlet (10) as far as possible.
4. Install a new fluid inlet seal (8) into the recess area on the nozzle carrier (5) inlet port.
5. Slide the nozzle carrier (5) into air cap adapter (6) and insert into the gun body (11) as far as possible. Be sure the nozzle carrier (5) extends into the hole at the back of the gun head. Install the needle seal (23) but do not tighten.
6. Rotate the nozzle carrier (5) until the fluid inlet port in the nozzle carrier (5) is aligned with the threaded hole in the body. While in this position, insert the fluid inlet (10) and tighten firmly.
7. Tighten the needle seal (23) to approx. 12 ft.-lb. torque.
8. Tighten the fluid inlet (10) to approx. 25 ft.-lb. torque.
9. Tighten the locknut (9) to approx. 33 ft.-lb. torque.
